

COMPETITION 2 RACE 2-INTO-1 EXHAUST SYSTEM*

- Radical 2-into-1 headpipe design stepped 1³/₄" into 1⁷/₈" designed for performance and increased lean angle as well as a very aggressive exhaust sound
- Made to fit aftermarket mid controls by Speed Merchant, Performance Machine and Boosted Brad
- Stainless steel construction and hand TIG welding
- Partial coverage heat shields included
- 18mm O₂ ports with 12mm adapters
- Includes mounting hardware
- Billet slash-cut end cap
- Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
1800-2538	For 17-21 FLHT/FLHTK/FLHR/FLHX/FLTRX/FLTRU/FKLTRK w/ aftermarket mid controls from Performance Machine, Speed Merchant and Boosted Brad	\$1,299.95

UNIVERSAL iO PHONE MOUNT

- Secure devices within any vehicle with a flat mounting surface (stick on or bolt on options)
- Universal kit is perfect not only for UTVs but also boats, tractors, semis, hot rods and more
- Attach razor-thin iOadapt™ stainless steel adapter to your device and connect to the powerful iOcore™ magnetic carrier
- No special case needed; device is held in place by the strong iOcore magnet, and can be adjusted to preferred angle
- Included in box: one Hemisphere mount, adhesive patch, two iOadapt steel disks and one magnetic black iOcore
- Adhesive requires 72 hours for proper cure time
- Purchase additional iOadapt discs to use multiple devices on same mount

NOTE: Not for use with phones that have inductive charging.

NOTE: Not for use with Samsung Galaxy S4 phones.

DYNOJET

POWER COMMANDER V*

- Fuel control for each individual cylinder in a smaller enclosure
- "Warm-up" fuel adjustment (unit reads engine temp and allows fuel/timing adjustments based on the reading)
- Includes ignition adjustment feature; allows full ignition timing control of each cylinder
- Easy to install
- USB powered from computer; 9 volt adapter is no longer needed
- Two-position map-switching function built in
- Can add any Single Pole Single Throw (SPST) switch and toggle between two different fuel maps
- Gear/speed input allows for map adjustment based on gear
- Analog input allows user to install any 0-5 volt sensor
- Build an adjustment table based on analog input such as boost or temperature
- Power Commander V is capable of allowing each cylinder to be mapped individually and for each gear with the gear position input connected
- Enhanced "accel pump" utility
- Made in the U.S.A.

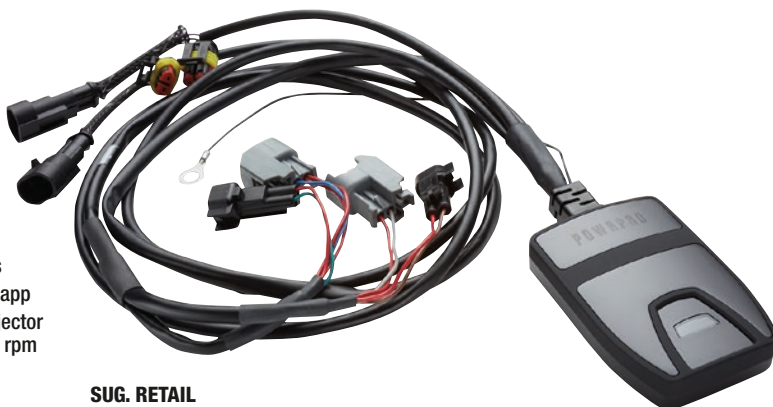

PART #	DESCRIPTION	SUG. RETAIL
1020-3481	For 22 Chief w/ crank sensor	\$429.95

Fi2000®

Fi2000 POWRPRO BLACK*

- Requires no dyno-tuning – plug it in and ride
- PowrPro Black analyzes, tunes and adjusts your air/fuel ratio for peak performance instantaneously
- Tunes acceleration fuel delivery in every gear for peak performance
- Works with stock or modified engines, air cleaners and exhaust systems
- Can fine-tune the non-acceleration air/fuel curves using the Bluetooth® app
- Can tune engine fuel delivery in specific ranges, check rpm, read fuel injector pulse width and duty cycle, and add or remove fuel in low- or mid-range rpm

PART #	DESCRIPTION	SUG. RETAIL
1020-3466	For 21 FLHT/FLHR/FLHX/FLTRX/FLTRU/FLHTCUTG/FLRT	\$529.95

Fi2000®

Fi2000R PLUG-IN FUEL PROCESSOR*

- Proven Fi2000R comes with leads that snap directly into the bike's injector bodies
- Standard open-loop design for 06 Dyna and all 07-08 models can use exhaust systems that do or do not have O₂ sensor bungs
- More advanced tuning for modified bikes
- Think of third tuning pot as an electronic main jet while thinking of the entire Fi2000R as a digital jet kit
- Full range of fuel adjustment (0-10 settings) across all rpm ranges
- Three easily identifiable lights: green – Fi2000R is adding more fuel to the air/fuel ratio approx. 14:1; green and yellow lights – these lights will be on in unison when throttle is open more quickly and air/fuel mixture is approx. 12.5:1; red – light comes on and stays on as long as the Fi2000R follows the fuel curve while adjusting to approx. 12.8:1 air/fuel ratio, which is where the engine will produce its best full-throttle power
- Step-by-step instructions
- Improves rideability by smoothing out the powerband and giving the bike more throttle response
- Corrects lean air/fuel mixture problems; eliminates overheating, hesitation on acceleration or an uneven cruising rpm
- Waterproof circuit board
- No fuel map adjustments or computer downloads required

PART #	DESCRIPTION	SUG. RETAIL
1020-3467	For 21 FLHT/FLHR/FLTR/FLHX	\$279.95

S&S CYCLE

A history of proven performance, driven by a passion for speed. S&S continues to be the industry leader for quality high-performance parts for your American V-Twin. Their new Tuned Induction Air Cleaners feature carefully engineered and laser-cut tubes merged to a single collector and dual high-flow air filters to create a stylish package that maximizes the performance of your M-Eight's intake system.

TUNED INDUCTION AIR CLEANERS*

- Uses two laser-cut and highly engineered tubes merged into a single collector, fed by a pair of high-flow air filters directly in the airstream
- Bolt-on performance: more than twice the filter area compared to the stock intake system
- Boosts horsepower and torque across the rpm range using air column inertia and carefully timed gas dynamic pressure waves
- Smooth intake tract using carefully selected and tuned lengths to aid performance
- High-flow, washable and reusable cotton media air filter elements
- Made in the U.S.A.

NOTE: Will not fit Touring models with fairing lower glove boxes or Twin-Cooled models.

SUPER-DUTY BIG BORE M-EIGHT PISTON KITS*

- Updates stock 107" motor to 124" when using 4.250" big bore cylinders
- Valve pockets are designed to accept up to +4mm oversized intake and exhaust valves
- Type 3 hard-anodized crown offers corrosion resistance for alcohol-added fuels
- Type 3 hard-anodized top ring groove eliminates micro-welding of ring to the groove and gives a hard-flat surface for ring to rotate on
- OE-style round wire locks are easily installed
- Heavy-duty wrist pins with true .9270" diameter to fit rods correctly
- Line2Line AST skirt coating starts out with a near-zero wall clearance and through the break-in period hones the cylinders to produce the correct oil wedge, keeping the piston square to the cylinder for best ring seal and quiet operation
- Kit includes 11.4:1 CR pistons, rings, pins and locks

NOTE: Requires the separate purchase of 4.250" bore cylinders
PART #0931-0823.

GASKET, SEAL AND O-RING DISPLAY FOR M-EIGHT® MOTORS

- Complete four-color display features gaskets, seals and O-rings for M-Eight® motors
- Displays are made from a 20 mil-thick flexible vinyl and come with all necessary hooks, clamshells and a complete listing of all gaskets, seals and O-rings necessary
- Mounts easily on any 1/8" or 1/4" pegboard
- Display is designed so that three 48" W X 32" H displays will fit on a single sheet of 4' x 8' pegboard
- Gaskets, seals and O-rings are not included; a list is furnished to allow you to stock the products that you desire
- Made In the U.S.A.

NOTE: GASKETS ARE NOT INCLUDED. TO STOCK YOUR BOARD FOR INITIAL SETUP AT TIME OF ORDER, THE FOLLOWING GASKETS ARE SUGGESTED.

RACE SERIES® OIL SYSTEM PACKS FOR M-EIGHT

- Includes Feuling's® High Flow billet camplate made from 7075 aluminum, which is 50% harder and stronger than the factory or Feuling OE+ camplates
- Increases oil flow and volume by enlarging the oil pump reservoirs and critical oil passages including matching the oil portholes throughout the camplate to the portholes in the engine case, which increases engine oil flow to the lifters, piston cooling jets, crankshaft and rod bearings
- Feuling oil pumps are bench tested, the relief valve is seated and sealed to a minimum of 30 psi with full pop off at 55-60 psi
- Increased oil volume from the larger gears and properly sized passages along with the pressure relief valve seat and seal from these oil pumps is essential for proper oiling system function
- Feuling® oil pump and camplate combination eliminates common pressure and scavenge issues associated with the factory oiling systems
- Feuling M-Eight oil pumps have the groove machined on the back cover to accept the factory crank bearing seal
- Quieter and smoother engine operation
- Increase oil pressure, scavenge volume and engine oil flow
- 42% more scavenge volume with port sizing, matched passages and holes to the engine case
- 68% more oil volume to the crankshaft and connecting rod bearing
- 15-25 degree cooler engine temperatures
- 15-30 degree cooler oil temperatures
- 10-30 more psi of oil pressure
- M-Eight Twin-Cooled™ motor oil pump specs: 30% more pressure gear volume over stock and 53% more scavenge gear volume over stock
- M-Eight Oil-Cooled motor pump specs: 27% more pressure and scavenge gear volume over stock
- Reduces wet sumping, blowby and oily air cleaners
- Test results show 2 HP gain and 2 ft/lbs of torque gain to the rear wheel on M-Eight
- Includes a Race Series® oil pump, Race Series® short-travel hydraulic roller lifters, High Flow camplate and cam installation kit, cam bearing, cam/crank bolts and washers, engine and fastener assembly lube
- Billet 7075 aluminum oil pump which is 50% harder and stronger than the factory pump holding tighter tolerances under temperature
- Race Series® oil pumps feature increased scavenge side kidney port volume over HP+ oil pumps
- Race Series® short-travel hydraulic lifters have .115" of total travel and will increase rpm by decreasing valve float and valve-train harmonics while maintaining a quiet engine
- The travel reduction reduces the amount of oil that is required to fill the inside of the lifter, which reduces oil aeration inside the lifter on steep, fast action high lift camshaft lobes
- Made in the U.S.A.

NOTE: Optional Feuling X ARP bolt kit available for the High Flow camplate PART #0932-0192 and HP+ or RS oil pump combo. See PART #2401-0993, optional ARP oil pump bolts do not use washers.

NOTE: Feuling test results show as much as 50% reduction of engine sump oil level.

NOTE: M-Eight engines must check clearance on front exhaust lifter to camshaft flange fit.

0932-0293

0932-0294

PART #	DESCRIPTION	SUG. RETAIL
0932-0293 ^{1, 2}	For 17-21 M-Eight oil-cooled motors w/ gear or chain drive	\$1,199.95
0932-0294 ^{1, 2}	For 17-21 M-Eight Twin-Cooled™ motors w/ gear or chain drive	1,199.95

¹ Block-off plate PART #0932-0036 required when using gear drive cams.

² Use with short-travel pushrods PART #0928-0114 on stock base circle camshafts with Feuling short-travel lifters (includes Feuling grinds 405, 465, 472, 508, 521 and 592).

RACE SERIES® OIL SYSTEM PACKS FOR TWIN CAM

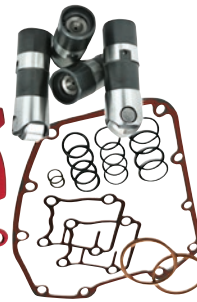

- Quieter and smoother engine operation
- Increase oil pressure, scavenge volume and engine oil flow
- 25-35 degree cooler engine temperatures
- 15-30 degree cooler oil temperatures
- 15-30 more psi of oil pressure
- Eliminate wet sumping, blowby and oily air cleaners
- Test results show 3 horsepower gain and 4 ft./lb. of torque gain to the rear wheel
- Billet 7075 aluminum oil pump is 50% harder and stronger than the factory pump; holds tighter tolerances under temperature
- Includes Race Series oil pump, Race Series short-travel hydraulic roller lifters, high flow camplate and cam installation kit
- Race Series short-travel hydraulic lifters have .115" of total travel and will increase rpm by decreasing valve float and valve-train harmonics while maintaining a quiet engine
- The travel reduction reduces the amount of oil that is required to fill the inside of the lifter, which reduces oil aeration inside the lifter on steep, fast action high lift camshaft lobes

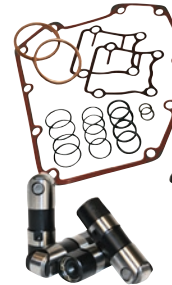

NOTE: Optional Feuling x ARP oil pump/camplate bolt kit available PART #2401-0993.

0932-0291

0932-0290

PART #	DESCRIPTION	SUG. RETAIL
0932-0291 ^{1, 2}	For 07-17 Twin Cam and 06 Dyna w/ gear or chain drive	\$1,029.95
0932-0289 ²	For 99-06 Twin Cam (except 06 Dyna) w/ gear driven cams	1,029.95
0932-0290 ²	For 99-06 Twin Cam (except 06 Dyna) w/ chain driven cams	1,039.95
0932-0292 ^{2, 3}	For 99-06 Twin Cam (except 06 Dyna) w/ chain drive conversion camplates upgrade to 07-17 Hydraulic tensioners	1,029.95

¹ Gear Drive cam systems require block-off plate kit PART #0932-0036.

² Use with short-travel pushrods PART #0928-0116 on stock base circle camshafts (Feuling 525, 543 and 574 grinds) and PART #0928-0117 on small base circle camshafts (Feuling 594 and 630 grinds).

³ Conversion camplates use 99-06 style camshafts; oil system pack requires separate purchase of hydraulic chain drive tensioners, chains, sprockets and spacers.

RACING VALVE SPRING KITS*

- Kits are designed for maximum performance
- Features interference-wound, double-chrome silicone springs and H.T. steel base washers
- Available in a complete set for one engine
- Includes springs, H.T. steel keepers, H.T. steel or titanium spring retainers and red Viton® valve seals
- Made in the U.S.A.

KURYAKYN

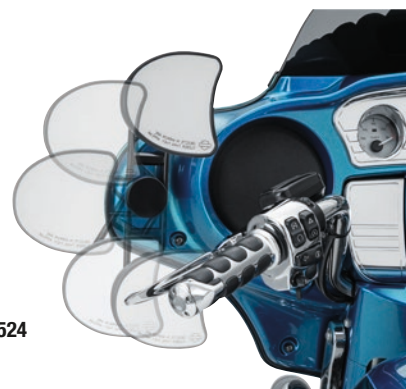

ADJUSTABLE DROP MIRROR MOUNTS

- Black anodized billet construction
- Delivers 180° of adjustability for stock batwing fairing-mounted mirrors
- Relocates factory fairing-mounted mirrors up, down or even further out

PART #	DESCRIPTION	SUG. RETAIL
0640-1523	For 14-21 FLHX models	\$199.99
0640-1524	For 06-13 FLHX models	199.99

0640-1524

1" HANDLEBARS

- Available in Bagger or Ape Hanger styles with 16" height option
- Feature a high-luster chrome or gloss black finish
- Manufactured with quality construction, including laser-cut, burr-free holes and slots for internal or external wiring
- All handlebars have 3 1/2" on-center knurling and are notched for Throttle-By-Wire applications
- All handlebars are CNC bent for an accurate fit and incorporate comfortable, but aggressive looking wrist angles
- Bagger bars are designed for correct clearance on Batwing models

NOTE: Fits 1" risers. Models originally equipped with handlebars having a center section diameter larger than 1" will require changing the risers to a 1" ID version.

41MM TRIPLE TREE

- CNC-machined billet aluminum
- Stem threads into underside of top triple tree for cleaner look
- Available in a 7° smooth design with a Night Series finish
- Made in the U.S.A.

NOTE: Raked triple trees change the handling characteristics of the motorcycle. Steering geometry must be calculated to determine which degree of rake is most suited for your application. Trees with more than 3° of rake should not be used in stock frame applications.

FORGED BILLET DRIFT RIMS

- All rims are CNC-machined from radial forged 6061-T6 aluminum for maximum road durability and strength-to-weight ratio
- Features a rolled rim lip for the custom look and detailed CNC machine work from the center of the hub to the edge of the rim
- Rims can be used on both front and/or rear applications when correct hub kit is installed (sold separately)
- Rims accept Arlen Ness hub kits (sold separately), which allow full wheels to be assembled in minutes with basic tools
- Structurally tested to meet or exceed DOT, JAS and TUV international load ratings

NOTE: Arlen Ness hub kits must be purchased separately to install. Please see the 2021 Drag Specialties FatBook or the Drag Specialties/Parts Unlimited Indian catalog for required hub kits.
